

Miele

The best way to enjoy a perfect coffee

Miele's CM 5 freestanding coffee systems

CM5

Those, who would like to enjoy top-quality coffee must place great focus on quality. And that is precisely what Miele countertop coffee machines offer: Dependability and durability of more than 50,000 cups of coffee can only be achieved using high-end materials. Miele does not entertain any compromises when it comes to appliance production and uses brushed stainless steel, sturdy sheet metal, high quality plastics and elegant chrome. These rich choice materials merge into the exclusive design of the new CM 5 countertop coffee machine series and turn every cup of coffee, latte, macchiato, cappuccino or espresso into pure pleasure for all the senses.

During the development of the countertop coffee machine, Miele benefitted from its many years of experience: the innovative and freely positionable units allow for maximum flexibility when designing your living space. Experience with Miele the new freedom of perfect coffee pleasure.

Better than a cup of good coffee: Two cups of good coffee

Miele's CM 5200 countertop coffee machine is a technical development based on its predecessor.

With the aim of being "forever better", key components were modified and now offer maximum user convenience.

A highlight of Miele's CM 5200 is the one-touch function: Coffee pleasure is now not only twice as good but also twice as simple to produce: By pressing the control button twice, two hot beverages are produced in succession in one process. Perfect for an afternoon with coffee and cake or for coffee lovers.

Pressing the control twice delivers twice as much pleasure

The one-touch function on the CM 5200 produces two cups of cappuccino or two glasses of latte macchiato simultaneously. The hot beverages are delivered conveniently via the central spout unit. Glasses and cups no longer need to be moved around. To achieve this, it was necessary to redesign the spout unit: Alongside the two spouts for coffee, the spout unit now also houses outlets for milk and milk froth.

Self-cleaning Cappuccinatore

After hot milk or milk froth has been prepared with the Cappuccinatore, the milk hose can be rinsed by the touch of a button: Simply insert the milk hose into the drip tray and select 'Rinse' from the menu.

Noble elegance in steel

"Brushed stainless steel" – gleaming new splendour for the drip tray cover on Miele's CM 5200 countertop coffee machine. Perfect match for materials and finish on spout and machine front. This elegant design is the centre of attraction in every kitchen.

From espresso to cappuccino:

a wide variety at Miele is standard

Enjoy the widest range of beverages a Miele countertop coffee machine ever had to offer: Next to the inclined display are direct-access buttons for espresso and cappuccino.

The one-touch function on the new machines now also allow latte macchiato and cappuccino to be prepared by a single touch of the appropriate button.

For the individual preparation of hot beverages, caffè latte (milk coffee), hot milk, milk froth and hot water can be selected directly from the menu.

Pleasure at home. With many extras.

When looking for a perfect coffee machine, a CM5 model will convince not only with its elegant design. High-end materials and an excellent range of functions for magic coffee specialities you will never want to miss again. The following features guarantee finest coffee pleasure:

Intuitive operation.

Beautifully simple, simply beautiful.

All functions are available for selection in the display. Choose your favourite beverage and start the preparation process. The display provides information automatically on all actions required by the operator. The display matches those on Miele built-in appliances – Miele design from the same mould.

- Text display, conveniently inclined towards the user
- Simple operation thanks to intuitive user interface
- Never more than a few steps away from perfect results
- Automatic prompts for safe use

Quality right from the start: high-end materials

Reliable functions and durability can only be achieved with high-grade materials. This is why Miele sets the highest of standards right here - in keeping with Miele's philosophy: first-class quality for first-class pleasure.

- High-end appeal: choice of materials
- Stainless-steel spout
- Stainless-steel front
- Cup rest made from chrome-plated sheet metal

**AromaticSystem:
for finest aromatic coffee**

The percolator unit with its dynamic percolation chamber expands as water enters. This allows coffee and water to blend better and results in a more aromatic product. After percolation, the volume of the chamber reduces as pressure drops and the coffee grounds are pressed and ejected into the coffee grounds container.

- Excellent coffee aroma

**Milk froth the easy way:
with the Cappuccinatore**

The Cappuccinatore allows hot milk or milk froth to be prepared with the greatest of ease. The Cappuccinatore draws in cold milk from a separate vessel via a hose. The hot milk or milk froth is delivered straight into the cup or glass in a matter of only seconds.

Cleaning under running water couldn't be simpler.

- Simple preparation of milk or milk froth
- For an exquisite cappuccino, latte or latte macchiato
- Simple to use
- Simple to clean

**Perfect for any type of coffee:
customisable parameters**

Depending on the coffee type and the desired flavour intensity, various parameters can be customised to taste by users: degree of fineness from very fine to coarse, ground quantity, percolation temperature, pre-brew (yes/no) and the quantity of water. This allows you to extract the best from all types of coffee and blends for your coffee speciality.

- Each coffee prepared to perfection
- Individual settings
- Simple to use

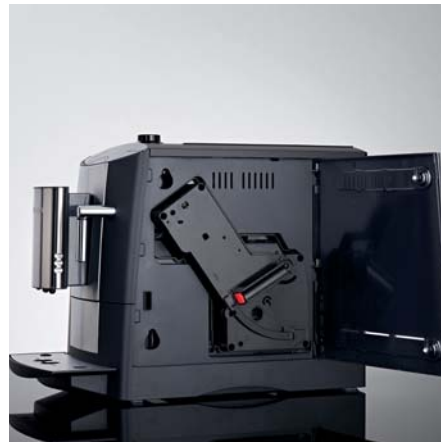

**Always at the right height:
Smoothly adjustable spout**

The spout on the Miele CM5 is height adjustable. This allows sufficient clearance for a latte macchiato glass. And the lowest setting is ideal for espresso.

- Smooth height adjustment from 70 to 130 mm
- Convenient preparation of latte macchiato
- Wide variety – from espresso cup to latte macchiato tumbler
- One or two espressos/coffees made simultaneously
- No heat losses

**Perfect hygiene and durability:
easy-to-remove percolator unit**

The brew unit is the heart and soul of automatic coffee making. It can be removed with a simple hand movement for rinsing under running water. This ensures that the machine works to perfection even after many years, producing coffee of the same high quality and extending the life of your machine.

- Simple to remove
- Easy to clean under running water
- Perfect hygiene
- Consistently high coffee quality
- Excellent durability

**Best Miele quality:
tested to last 20 years***

Miele coffee machines stand for unparalleled quality.

Quality you can depend on.

- Excellent dependability
- Excellent durability

* Corresponds to approx. 50,000 cups of coffee or espresso

HAVE QUESTIONS?

Please ask your Miele Chartered Agent for more information or go to miele.ca

What is Miele ForeverCare?

Miele provides unique advantages to our customers with a combination of features unparalleled in the appliance category, namely:

Manufacturer-Direct Service.

If you ever have a problem with your Miele machine, it's our own Miele Factory Service Technicians who take care of it. Most problems can be solved on the first visit, as we know the exact model you have and carry the genuine Miele parts you will need.

Extended Warranty from the Manufacturer.

We want you to enjoy a long and trouble-free experience with our machines. In addition to the standard warranty, we have Miele Extended Warranties. This direct offer from Miele allows you to increase your hassle free coverage up to ten years (coffee machines 5 years). The extended warranty relationship remains directly with Miele, so you can deal with us if you have any issues.

Miele Delivery.

We offer delivery to your home ourselves. We want to be with you every step of the way, and your delivery is tracked with GPS so we can provide you with a nearly exact time of delivery.

Miele Certified Installation Program.

We want your machine to work perfectly from the first time you use it. So, we offer Miele Certified Installation in your home ourselves, with our fully Miele Certified Installation Team. Installation can be organized through the Miele Customer Care Centre, and when you choose Miele Certified Installation you will receive an additional year (total 2 Yr) manufacturer's warranty on the appliance and the installation.

Miele CareCollection.

To ensure you make the most of your Miele appliance, we've created a range of everyday and specialty products available for purchase. From laundry detergent, to dishwasher tablets and a variety of cooking accessories, these products are designed specifically for your appliance, ensuring better results and a longer hassle-free lifespan. mieleboutique.ca
